Kingdy Industrial (Multi) Touch Monitor

A full range of solutions for a wide variety of industrial criteria including extreme temperature resistance or sunlight readable

Kingdy Industrial (Multi) Touch Monitor

Challenges

For PC-based automation system deployers preferring traditional standalone or client-server architecture for technical or economic reasons, an industrial rated touch monitor is an essential device to link up operators with the system. Radically different from commercial or residential applications, industrial environments are usually harsh, with hazards that can range from extreme temperatures, ambient light disturbance, water & dust intrusion, corrosion and oily & greasy contamination. The resistance to one or some of the above-mentioned factors should not be ignored when assessing whether a monitor can well work with the system.

Solutions

In response to different environmental conditions, Kingdy develops a full range of solutions featuring one or some of the following characteristics and allowing entrepreneurs to easily select and deploy an appropriate monitor to address the challenge(s) they are facing.

- Wide operating temperature range
- Sunlight readability
- Full IP65 water-/dust-proofing
- 19" rack mountability

Highlights

TA / UA / EA / VA Series

● 7H hardness anti-scratch panel surface
to avoid touch function failure due to scratch

● Oil- & water-stain-proof panel surface
to ensure touch sensitivity

● Enhanced PCT touch panel
to enable input with glove which is necessary in some applications such as semiconductor / panel clean room, PCB or metal processing
